

DEC-CLAD DRIP EDGE

critical leak point protection

THE PRODUCT ADVANTAGE

Don't settle for less, Dec-Clad Drip Edge eliminates the need for adhesives and unsightly clips. There is now no need to wrap the membrane over the face of the deck and risk weakness and water penetration.

Dec-Clad Drip Edge offers the easiest and most efficient way to terminate membrane details. Dec-Tec membrane is thermally heat welded directly onto the Dec-Clad Drip Edge ensuring a strong, lasting watertight detail in addition to a great aesthetic finish.

FEATURES:

- PVC coated G90 galvanized steel
- Welded terminations ensuring a watertight solution
- Eliminates the need for adhesives and unsightly clip systems to protect against leaking
- Color coordinated patterns and colors to compliment all Dec-Tec membranes
- Colors: Granite, Bronze, Brick, Solid Grey, CoolStep White, Brown and Black
- Available in 8' long lengths, easily cut and fit on site
